Welcome to GENG8030-2 / Please fill the form

Yasser Alginahi posted on May 1, 2023 1:18 PM • Edited

Please fill the form, ASAP, I need to decide on the tutorials timing and the earlier we do this the faster we can book a room.

Hello,

I would like to welcome all of you to the GENG8030-3 course. I am Dr. Yasser Alginahi and I will be teaching you this course.

Please note that this course teaches you computational methods and modeling using MATLAB. I have posted the first three lectures and I will be posting the syllabus as soon as the list of GAs is finalized and I get your feedback on the best time to have an optional tutorial time. I have been teaching this course since Summer 2022 and I find it very helpful to offer optional tutorial sessions where the GAs will help you solve some application problems. The tutorial questions will be posted before the tutorial time; however, the solutions will not be posted and you have to attend the tutorials to get the solutions. These tutorials are optional, meaning you do not have to attend them if you know how to solve the posted problems. Otherwise, I do encourage all of you to attend these tutorials as this will help you do well in the course.

Please fill the following form with the best timings for the tutorial sessions. I appreciate if you could do this right away so I can contact the registrar's office to book the rooms.

Thank you and I look forward to meeting all of you on Tuesday.
